

The IBTC Dumped My Specimen

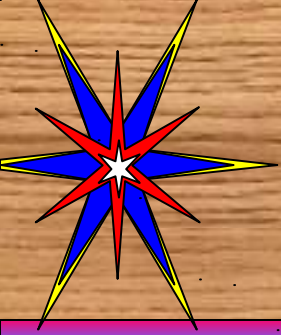

Enabling Learning Objective

Select from a list the action a UPL must take when a specimen is dumped by the IBTC, State Program Manager, or other appointed person during a quality control check.

My Specimen was Dumped

- ▮ Prior to the specimens being shipped to the FTDTL the IBTC, State Program Manager, or other appointed individual will perform a quality assurance check on the specimens that you collected. If that person finds a error that would result in a non-testable discrepancy, then he/she may destroy that specimen.**
- ▮ You will be notified of the dumped/destroyed specimens either on the spot or as soon as possible.**

My Specimen was Dumped

- ▮ You will annotate that the specimen was destroyed/dumped, who destroyed it, and why on your Unit Ledger.**
- ▮ You will inform the commander of the specimen(s) that were destroyed and why. The commander's WRITTEN policy should dictate the procedures to follow for destroyed/dumped specimens. The commander may require all of those Soldiers to re-test.**
